

Draft

The drawing as amended by the most recent amendment in this application contains six views. Of the six, each of Figs. 3, 5 and 6 contains new matter relative to the original drawings as filed. The remaining views, Figs. 1, 2 and 4 conform to the original perspective and side views, do not contain new matter, are enabling, and are in conformance with current case law regarding enablement. They also establish priority under 35 USC 120, and avoid all rejections by the examiner and the Board of Patent Appeals and Interferences. Accordingly, applicant will amend the drawing in response to the Notice of Allowability so that the drawing contains only the figures now shown as Figs. 1, 2 and 4, renumbered as Figs. 1, 2, and 3. These actions will be taken as agreed in a conversation between the examiner and attorney of record, Coe Bloomberg, on *date*.
